# X4 dp COAXIAL

Multifunctional premium-class compact 2-way system. The coaxial configuration in combination with a carefully designed large-area horn ensures absolutely constant response even off the main axis. High-power Neodym drivers and long-excursion coils provide high efficiency and reduced distortion. Nine M10 threaded mounting points are available to mount MultiRigg hardware and other accessories for installation or mobile applications. The integrated digital amplifier technology provides 800 / 400 Watt AES and DSP control. A range of factory-configured presets and volume settings can be selected.

The **X 4 dp** features integrated digital amplifier electronics with a DSP controller (dp = digitally powered). Various factory-configured presets and volume settings can be called up directly on the box or via a network connection.

High-grade electronic components from the industrial sector and a first-class circuit design ensure excellent audio quality with low distortion and a minimal noise floor. Highly efficient and "intelligent" limiter systems ensure optimum protection against overload, without restricting the possibilities offered by this high-performance sound system.

Presets

Flat
This setting provides a linear
frequency response with a neutral
sound characteristics. Standard
setting for many applications.

HP
Switches in a high pass filter for use
in combination with a subwoofer.

Boost
The same neutral response as the
„Flat"setting, but with the addition
of a bass boost.

Soft
Reduces the level in the frequency
range from 2.5 - 5 kHz, to which the
ear is particularly sensitive. This
setting is recommended for high level
reproduction of highly compressed
music tracks.

XLR
- Symmetrical analog input.
- Effective filter protection against
  HF interference and DC Voltages.
- Electronically balanced to prevent
  noise.

Ethercon
Interface for remote
control and audio transfer
via ethernet (AES 67).

Powercon (blue)
Power supply
∼ 110-230 V / 16 A max.
