

## NEW Apollo x16D

Thunderbolt Audio Interface with Dante®

LAUNCH DATE: July 16, 2024 @ 12AM local time

MEDIA RESOURCES: [u.audio/apollo-x16d-pr](https://u.audio/apollo-x16d-pr)

## Apollo, meet Dante.

Perfect for live sound venues or networked recording studios, Apollo x16D gives you elite-class Apollo X sound and realtime UAD plug-in processing over Thunderbolt and Dante.

With Apollo x16D, you can mix and record live performances with over 200 UAD plug-ins from Neve, SSL, and Auto-Tune, plus classic LA-2A and 1176 compressors, and more.

## KEY BENEFITS:

- Mix studio and live performances using award-winning UAD plug-ins in realtime over Dante
- Use Plug-In Scenes to recall settings instantly, even in the middle of a performance
- Turn any space with ethernet into a multi-room Apollo recording studio
- Link up to four x16Ds for a 64-channel Dante system with network redundancy
- Bring your best UAD plug-ins like Auto-Tune, Neve, and Lexicon from studio to stage
- Choose between Essentials+ and Ultimate+ editions, adding up to 100+ UAD plug-ins worth thousands of dollars

## KEY FEATURES:

- 18 x 20 audio interface featuring Dante I/O (supports AES67 mode @ 48 kHz)
- 24-bit / 192 kHz elite-class Apollo X D/A conversion
- Stereo AES I/O for connection to professional digital outboard hardware
- Includes up to 100+ UAD plug-ins with Ultimate+ or Essentials+ editions
- Recall plug-in settings over MIDI, even in the middle of a performance
- Onboard HEXA Core Processing for mixing with UAD plug-ins at near-zero latency
- Compatible with Thunderbolt Apollo interfaces to expand systems over Dante\*
- Create 16-channel immersive audio mixes for Dolby Atmos, Auro-3D, Sony 360 Reality Audio, and others
- ALT monitoring support in all monitor modes (2 x ALT mon for stereo, 1 x ALT mon for all)
- Free industry-leading technical support from knowledgeable audio engineers

## NEW UAD Console:

- Plug-in Preset Browser
- Plug-In Scenes with MIDI Recall
  - Ideal for show files and snapshot song automation
- Flex Routing via Dante I/O
- Updated UI / UX
