

Two-Way Line Array **Galeo S**

A compact, general purpose high performance line array featuring a number of innovative acoustical and mechanical solutions. This 2 x 6,5" / 1.4" system has an integrated crossover, and therefore requires only one amplifier channel. The Galeo S is a visually inobtrusive sound reinforcement system equally suited to high end permanent installations and demanding tour applications. A choice of horizontal coverage angles of 70° or 100° is provided by the interchangeable AMR horn elements. The maximum splay angle of 16° allows for a high degree of curvature in the line array with a small number of cabinets.
